We are updating View Royal's Transportation Master Plan to improve safety, accessibility, and connections for all road users.

- Reduce traffic congestion
- Improve connections to regional destinations
- Improve infrastructure to promote alternative transportation choices

What We've Already Heard from View Royal Residents and Businesses

Community members have shared several transportation-related concerns and opportunities via surveys and public engagement events on related projects.

Public Transit

- Concerns about insufficient service; interest in rapid transit and better amenities.
- Support for integration of transit with walking and cycling routes.

Traffic & Roads

- Concerns about congestion and speeding on major corridors.
- Support for traffic calming, road improvements, and parking solutions.

Active Transportation

- Support for walkable, bikeable neighbourhoods with safe crossings and trails.
- Support for connected, protected bike lanes and secure bike parking.
- Concerns about safety at key intersections.

Accessibility

- Support for more sidewalks and accessible parking.
- Support for improvements that accommodate people of all abilities.

Planning & Growth

- Support for linking transportation improvements to new development.
- Support for sustainable, transit-connected, walkable neighbourhoods.

"It would be nice if a transport plan is developed to reduce the traffic and improve movement."
